

## Mockup Review Notes

- The title is a bit illegible, maybe you could put the Tamagotchi logo as the title
- I really like the gallery option of Mockup A, its leading towards the playful aspect I'm trying to achieve.
- I wonder if theres a way to incorporate colors/ design in a way that isn't a pile of Tamagotchis, or maybe in a way that doesn't feel so constrained. I really like the image of the Tamagotchi being worn on the jeans, so maybe including more images of them being used
  - o Trying to lean more into a playful layout
